

# 1/3 STUDY METHOD

Calculate the # of days you have until the exam and split your time evenly between each of these three areas.

## Conceptual

This is your opportunity to review all the material for the test!

### Examples:

- Create a crib sheet.
- Read/create a study guide.
- Make flash cards or concept maps.

## Fill in the Gaps

Refine your knowledge and practice/learn the concepts that are most confusing to you.

### Examples:

- Attend tutoring, office hours, and help desk.
- Study/practice concepts you "hope will not be on the test."

## Practice

Master the material! Apply your knowledge of the concepts by using them in practice.

### Examples:

- Practice and simulate the exam and testing conditions.
- Use old exams, homework, and practice problems to master the material.
